Climate Policy

Purpose

SECURE Waste Infrastructure Corp. is committed to managing climate-related risks and opportunities, reducing greenhouse gas emissions from our operations where viable, and strengthening the resilience of our business to the potential impacts of climate change.

We will pursue meaningful emissions reductions, integrate climate considerations into business decision-making, and evaluate opportunities associated with a lower-carbon and more circular economy that align with our capabilities and strategy.

Scope

This Policy applies to all SECURE employees and operational activities and may also guide engagement with suppliers, contractors, consultants, customers and other value-chain partners.

Guiding Principles

We are guided by:

Responsibility — Recognize our role in managing and reducing emissions and strengthening resilience.

Pragmatism — Prioritize meaningful actions based on technical, operational and economic viability.

Transparency — Measure and disclose climate-related performance, risks and opportunities through applicable reporting.

Collaboration — Work with customers, governments, industry, technology providers, Indigenous Partners and communities to support practical solutions.

Policy Commitments

Emissions Reduction

- Measure and monitor Scope 1 and Scope 2 GHG emissions and improve our understanding of relevant Scope 3 emissions as data develops.
- Establish emissions-reduction targets and milestones where supported by reliable data, identified opportunities and a credible pathway to achievement.
- Pursue energy efficiency, operational improvements and lower-emission technologies and energy sources where technically, operationally and economically viable.
- Integrate climate considerations into relevant strategic, capital planning and asset-management decisions.

Climate Resilience and Adaptation

- Assess physical and transition climate-related risks and opportunities across relevant planning horizons.

- Integrate climate considerations into enterprise risk management, facility design, emergency preparedness and business continuity planning.
- Innovation and Opportunities
- Encourage employee-led ideas and operational improvements that reduce emissions and environmental impacts.
- Evaluate emerging technologies and solutions that may reduce emissions, improve resilience or create business value.
- Explore opportunities associated with a lower-carbon and more circular economy where they align with SECURE's capabilities, customer needs and business strategy.

Governance and Reporting

- The Board of Directors, through established governance processes, oversees climate-related risks, opportunities, strategy and performance.
- Executive leadership is accountable for implementing SECURE's climate strategy and integrating climate considerations into business decision-making.
- SECURE reports climate-related performance, risks and opportunities through its sustainability and other applicable disclosures, including CDP reporting.

Reporting and Disclosure

- Measuring and publicly reporting relevant climate-related performance, risks and opportunities through SECURE's sustainability and other applicable disclosures.
- Participating in climate-related disclosure frameworks, including CDP, where appropriate.
- Monitoring relevant regulatory disclosure requirements and evolving our reporting practices accordingly.
- Engaging with stakeholders, including investors, customers, and local communities, on material climate-related matters through established engagement processes.

Policy Review

This Policy will be reviewed at least every three years, or sooner where appropriate, to reflect material changes in SECURE's business, regulatory requirements, climate-related risks and opportunities, technologies and stakeholder expectations.
